

**ASYCUDA MISSION
TO
HERAT CUSTOMS HOUSE AND ISLAM QALA CUSTOMS OFFICE**

(19-21 June 2006)

According to the ASYCUDA Work Plan for the implementation of the Transit System in the 2nd axis (i.e. Islam Qala Customs Office/border with Iran → Herat Customs House → Kabul Customs House) the ASYCUDA Project Team has visited the Herat Customs House and Islam Qala Customs Office to

- check the status of the refurbishment of the Customs buildings
- test the network and electricity cabling
- identify the potential technical ASYCUDA Focal Points (members of the Local Implementation Teams)
- identify the customs officers that will work in the computerised transit operations
- meet the Customs brokers that will use the system.

The mission is appreciated as very effective for addressing the specific regional/local problems and finding solutions, as well as for agreeing on a realistic Action Plan that will ensure the timely and successful implementation of the ASYCUDA Transit System.
