

ASYCUDA++ TRANSIT SYSTEM

SECOND EXAM FOR THE LICENSING OF CUSTOMS BROKERS OPERATING ON THE 1ST TRANSIT AXIS

(14 February 2007)

The ASYCUDA++ Transit System is operational in the 1st transit axis, i.e. Torkham (border with Pakistan) – Jalalabad – Kabul since May 2006.

At that time, a first exam was organised for the trade operators in these regions to obtain the Customs Broker license. For Torkham, the exam was publically announced one month in advance and there were finally only 22 participants registered for it.

This year, following a lot of demands of the trade operators, a second exam was organised in Torkham. After two days, 238 participants were already registered for this exam. Similar to the previous events organised before, the ASYCUDA Team was again involved in the programme of certification of the trade operators in these regions as Customs Brokers.
