

# ASYCUDA PILOT IN DURRES PORT, ALBANIA

Durres Port is the second ASYCUDA Pilot site in Albania.

The pilot was implemented by the Albanian Project Team, with the support of the UNCTAD in-country advisers, in almost one month: installation/configuration of equipment and software, including communications, training of the Customs staff (3 shifts) and of the customs brokers' personnel, testing, parallel operation etc.

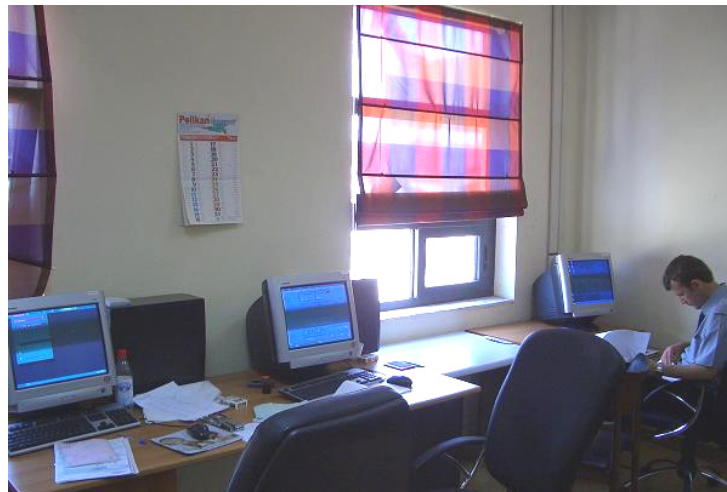

ASYCUDA is fully operational in Durres:

- 100% of the declarations are processed through ASYCUDA
- 100% DTI (Direct Trade Input)
- updates of reference data (tariff etc) are automatically replicated from the Customs HQ in the system in Durres
- all customs regimes, including transit and warehousing, are operational
- all customs declarations are automatically consolidated in the Customs HQ database.
