

ASYCUDA FULLY OPERATIONAL IN VLORA PORT, ALBANIA

ASYCUDA++ system was implemented in Vlora Port by the Albanian Project Team, with the support of the UNCTAD in-country Customs Adviser. The implementation of the system included: installation / configuration of the IT equipment and software, installation / configuration of the Albanian ASYCUDA system, the training of the Customs staff (3 shifts) and of the customs brokers' personnel, testing, parallel operation etc.

The implementation took almost one month, with the following milestones: 1st November 2004 – Processing of the first customs declaration, 17 November 2004 – 100%DTI, Closing of the manual procedures. ASYCUDA was fully is now fully operational in Vlora Port:

- 100% of declarations are processed through ASYCUDA and are automatically consolidated in the Customs HQ database.
- 100% DTI (Direct Trade Input).
- Assignment of the customs officers for physical control is done automatically by ASYCUDA.
- Updates of reference data (tariff etc) are automatically replicated from the Customs HQ to the system in Vlora Port.
- All customs regimes, including transit and warehousing, are operational.
