

ASYCUDA WORLD TECHNICAL MEETING IN THE MOLDOVAN DEPARTMENT OF CUSTOMS

Several ASYCUDAWorld (AW) technical meetings UNCTAD – Moldovan Department of Customs (MDC) have been organised in the MDC headquarters in Chisinau.

The meetings dealt mainly with

- the current status of the technical and functional implementation of AW (the system is currently implemented in 70% of the customs offices)
- the roll-out of the system in the remaining customs sites
- the integration into the AW environment of the additional e-documents (applications) developed by the Customs Computing Centre CIS “Vama”, i.e.
 - “Frontiera”⁽¹⁾ – for a comprehensive border crossing control
 - “Passenger Declarations”⁽¹⁾ – for the processing of summary customs declarations for tourists.

⁽¹⁾ *These two e-documents have been developed by the MDC programmers in a remarkable short period of time and concurrently with the prototyping activities, using AW development environment.*

Mr S.Beiu, Head of Development Team (left),
Mr V.Belicov, MDC analyst/developer (second left),
Mr F.Ciuperca, MDC analyst/developer (second right)
and
Mr T.David, ASYCUDAWorld Technical Coordinator,
UNCTAD (right)

Mr P.Siman, Senior IT Adviser, UNCTAD
